22	PEER REVIEWER'S OPINION	<p>Suggestions part is missing.</p> <p>Your Hypothesis has been worded as follows: There is difference between male and female in their ability for mechanical reasoning. The word significance is missing. It is a grave error. Rearrange and submit as follows: There is significance difference between male and female</p> <p>Significance should be given in a single paragraph and not in points.</p> <p>In Table 'n' of the sample has not been mentioned. 'df' is also not mentioned.</p> <p>Hypothesis have been framed only in terms of gender. The other sub variables have not been given. Why?</p> <p>If possible try to include, demographic variables such as age, locality, type of institutions, socio-economic status, etc., when the size of the sample is so large.</p> <p>Implication part is missing.</p> <p>Kindly send your data file in XL format.</p>
23	RECOMMENDATION FROM THE REVIEWER	I recommend that, this paper be accepted after correcting the minor errors.
