Abstract

Education is the process where every individual learns the things according their ability and interest because every kid has their panoramic own unique quality like strength, humanality, inner talent and ability. For this unique quality we need to design the activity based curriculum for the learners. Syllabus is the important part in the process of kid progress and teaching-learning process. Kid progress is the prime part of the education. When we look forward in this scenario, the level of competition increasing day by day. For this purpose, we focusing the children’s curriculum and co- curriculum activities inside and outside school and college also. Foremost requirement of the syllabus is to reduce in essential part according to subject and make wide space for critical thinking in subject content of pedagogy, make sure the curriculum should be panoramic discovery based and discussion based. These curriculum parameter and aspect fulfill only one word that is panoramic progress. Panoramic progress is the overall progress of kid that means social, emotional, physical, mental and intellectual growth of the human. Panoramic progress in education means focusing on the kid overall growth in various manner/aspects. Panoramic progress promotes self-confidence, self-awareness and increasing good sense of responsibility in each and every work. Panoramic progress process will help to develop the strong critical thinking abilities and problem-solving attitude among learners.

Panoramic progress is the extensive approach in teach which objective rich the goal for developing multiple abilities in human mind. It is the progress of physical, emotional, intellectual, social progress of learners and promotes the learning style with higher order expertise improvement. Panoramic progress is the combination of enhancing education model of empowering learners’ performance and teacher strategies in different area. Its benefits helpful to increase the standard of education and these standards will strengthen the nation building process of achievement.

Keywords: Panoramic Progress, NEP 2020, Panoramic Approach

Introduction

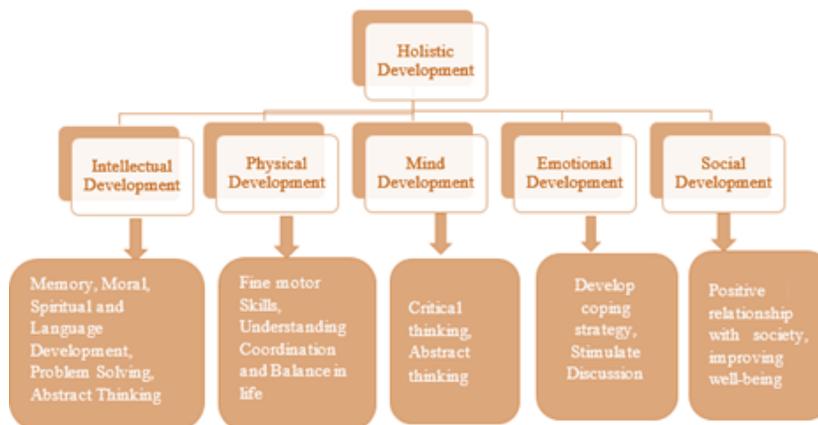

The panoramic approach to education develops learner’s social and academic maturity to accept life’s challenges, build their understanding, and learn from their errors (Sarkar, 2022). Panoramic education prepares a learner for lifelong learning. The educational focus moves toward the life expertises, attitudes, and humanal awareness the learner will need in an increasingly complex world (Sarkar, 2022). The panoramic approach to education develops social –emotional understanding and giving opportunities for facing the challenges. NEP2020 State that education should be focused on practical learning not on theoretical based. Quality education is

the requirement of the society and there no any gender bias caste, any other thing sare part for education. In NEP20202, Panoramic education is the fully progress of human humanality in all perspective like Cognitive, emotional, social, intellectual, spiritually).

NEP 2020 will transform this model through a flexible curriculum that creatively combines various disciplines. Learner will be able to choose from language and also integrate Applied Science, Mathematics, and Busmen Studies with humanities and arts (PBNS, 2022). NEP 2020 has laid transformative idea stores hape education. Teachers are central to the success of our education system (Macmilan, 2020).and this education system. Education is the source of learning where teacher is the eminent factor for brainstorming the learner ability. When it will come to connect with the real education pattern of practical cum theory based learning it gives lots of benefit to education system’.

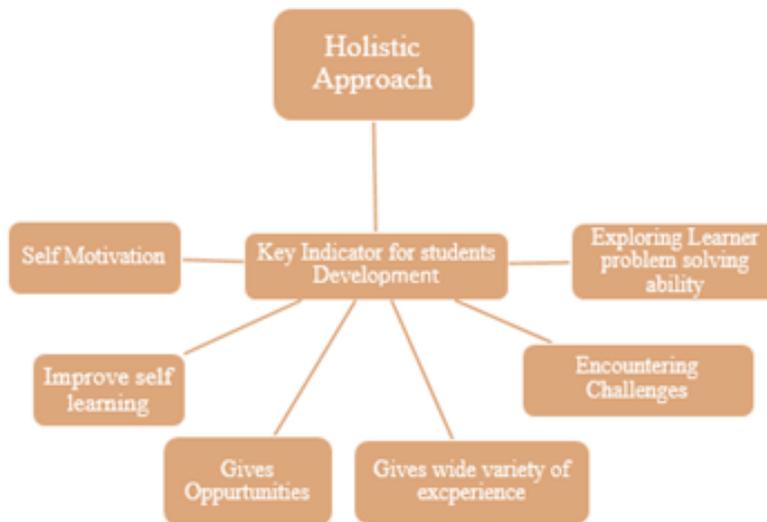

Conceptual Framework of Panoramic Progress

In order to thrive in today’s fast-paced world of technology, people need multiple expertises and the ability to think creatively. In today’s digital world life is going to be very fast and depends on fully technology based education system. Multiple expertises necessary for multiple activities perform in school (curriculum and co-curriculum activities) Panoramic education is based on the idea that children can be taught in a more natural and engaging way. Rather than compartmentalizing school subjects, the panoramic approach seeks to empower children to use their academic learning as a foothold for their emotional and social empowerment (Scholar Base, 2014)

A Panoramic Approach

A panoramic approach motivates and inspire learner to learn the subject in theoretically as well as practically. Panoramic approach helpful for developing curiosity and allow learning and understand the concept to learn the subject in naturally, creatively and practically. It also developing their expertises and build their confidence to actively participating in school activities. Enhancing the quality of Learners and they will find their way and connecting their bridge in between education in real world facts. Their creative expertises raise to help in solving their problem in various direction. Panoramic approach gives blessing to education and the process of progress of mind, body and spirit.

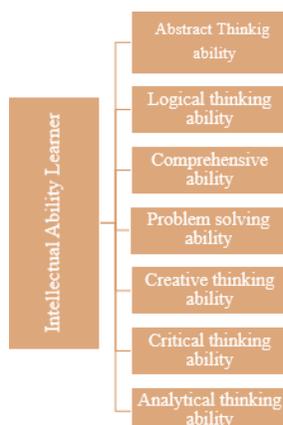

Characteristics of Panoramic Approach

- It is a supportive and positive situation providing the education in how to learn and what to learn
- Encouraging the learners to explore their intelligence and draw in the questions for self-direction.
- Also exploring the interest passion intelligence in their energy achievement in goal setting of carrier.
- To change the paradigm shift in education from content based learning to experiential learning.
- Useful technique and strategies for healthy education situation and learner engagement.
- Capabilities should be depends on teacher competencies, learners pre-test, pedagogy experiential learning, flexible curriculum, Good and positive infrastructure of school.

Intellectual Ability Progress

It is also known as cognitive ability. Intellectual ability is those where we got information and intelligence for panoramic progress. Intellectual progress is all about learning expertise enrichment. In this process how children use their mind ideas, thoughts and views for living in this situation. Language play very important role in intellectual progress .It is ability to growth and build a kid’s ability to learn, to think, to imagine, to reflect the thoughts in world. Through this ability children can solve their problem in required area or field. Which is very much important to organise the mind and ideas in specific zone where needful.

Physical Ability Progress

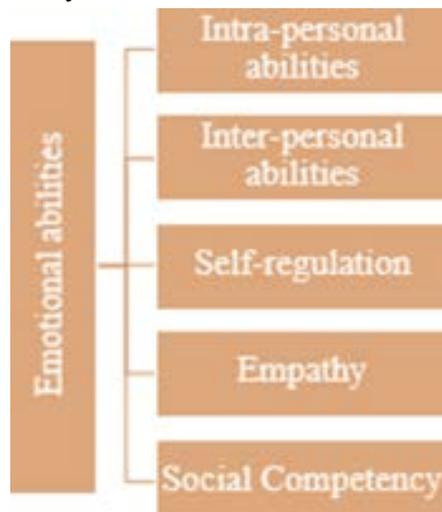

Physical progress it is related to motor expertise activity example climbing, walking, running, pushing, pulling these expertise involves muscle coordination and also psychomotor field are related to the panoramic progress through these activities. When an individual physically fit that means he/she is mentally fit. When Kid is physically well developing then he/she learn the new think, enjoy the practical intelligence and observing the new situation with enthusiasm. In School /College every day physical activity is compulsory like yoga, exercise, and sport. Physically fit children perform very strongly and confidently because they have sufficient energy to learn, to understand and to apply in any problematic situation. In education kid's overall progress is very much important and this progress process physical progress play very important role.

Mind Ability Progress

Nurturing and proper care of mind is a sign of healthy brain. Healthy brain is key of success and provide the opportunities to every individual in their career. Stable and healthy mind play vital role in very working place where it is needful. Mind ability raises the confidence in logical and reasoning area where learner can enhance their quality and smartness in any profession world. Mind ability is improve the conceptual framework of the any content by their imagination and thought process. For good and positive response of mind is needed then more practice for mindfulness activity and positive situation. In education make the school or college situation stress and burden free and establish the respectful rapport between learners and teacher.

Emotional Ability Progress

It involves through their emotion, feelings and caring about self-activities and work done by these feeling. For this bringing up the social activities in part of community engagement and awareness program and emotional ides of the mind needs to observation experience and evaluation for these learning to get closer for understanding and positive relationship, positive habits reaction from these act. These positive habits develop their trust and faith towards their work and it's also part of panoramic progress. Today's scenario we look forward towards the youth, the low penitent increase the anger level, Self-discipline is very important to control the anger and social progress necessary to teach them to control their emotions for that they will give anger management, dealing with changing habits, depress, stress management. These factor are responsible for to good social progress and these can possible only education.

Social Ability Progress

Social Progress is integral part of education to develop the social, spiritual, aesthetic and moral values among learners. Every individual is the part of society and for this society we need to make good citizen for national integration,. Due to this progress we generating youth power and strength to build the reputation of country and growth income and status of India. A good learners a good citizen .In panoramic progress social progress play vital role in emerging the growth of education and economy of the country .Live for nation and live for values is important in society.

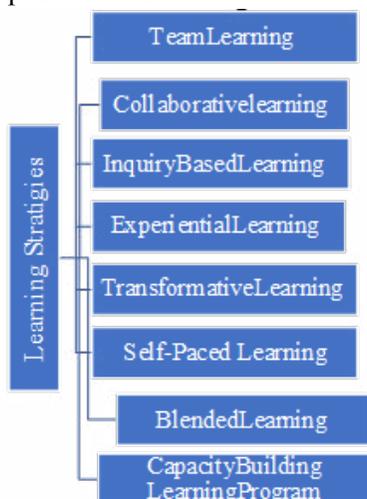

Why Panoramic progress Important

From beginning of the education, we always focus on over all progress of kid. From ancient, medieval and presenter a kid progress is necessary for learner enable to learn new things from different activities. In education purpose to actively participation of learners in all perceptive of curriculum it means make sure to enhance the quality of physical and, mental ability. It is imperative for exposing children to opportunities to find and develop their strength to the best of their abilities as well as strengthen their weaker expertises (Mcilroy, 2022) Learning is process of learn the things in simultaneously manner and it is interconnected to other part of learning like What they See, what they observe and what they hear .In Teaching –learning process teacher can improve their audio-visual perception, language awareness and proficiency, fine motor expertises, Attending and responding expertises, focuss and attention towards work. Academic expertise build only with the help of social physical mental and intellectual. Social emotional expertises are very much important to learn to regulate owns emotion and secure it. Express their emotion in good, positive and healthy way in accurate place.

It is imperative for exposing children to opportunities to find and develop their strengths to the best of their abilities, as well as strengthen their weaker expertises.

Significant Predictor of Panoramic Progress

Self-discipline, self-efficacy, self-regulation, self-reliance is most prominent and significant predictor for panoramic progress. If we want to increase the level of education then we need to focus on these key factors for the panoramic indicator.

Learning Strategies for Panoramic Progress

Team Learning- It increase the self-confidence, leadership quality and it occurs when a human sharing his/her intelligence and views in order to reach the destination of team work where an

individual learn with together for achieving the goal of team chores. Best part of team learning is the strong coordination and correlation between individuals. It shows hidden quality of the human while doing the team learning.

Collaborative learning

In collaboration learners play important role in large group or peer group. A sparp activity that provides number of opportunities and problem-solving abilities for learn and grow with collaboration of group it enhances the cognitive and affective field ability of the individual. Due to collaborative learning learner enhance their higher order expertise of learning and self - esteem.

Inquiry Based Learning

This is a learning process where engage the learners for exploration of ideas, thought and smart level of questioning that directly connecting the real world. In this process learning can encourage the learners for raising the questions and participating in experiential learning. Due to this learner boost their curiosity towards problem solving process on any topic and increasing the interest by involvement in inquiry-based learning.

Transforming Leaning

It is the tool to enhancing the results and outcomes of educational values also create the instructional learning material. Improving the concept and traits of the learning.

Conclusion

We need to understand what children need to requires from education it not only academic growth but also keep growing other than curriculum like extra co-curricular activities. Every parent's motive to send their children in school and college for need to learn some specialized things and betterment of future and also grooming for panoramic progress(Social, Intellectual, Physical, Emotional and Mental) In all round progress that means panoramic progress Education is the internal part for only education system can change the behaviors and help learner and help learners to understand his/her psychological pressure and teaching-learning process is only way to buildup the healthy and powerful situation to understand the relationship between positive and negative situation.
